

Paper Plate Polar Bear Activity

ENJOY THIS SEASONAL ACTIVITY WITH FUN ART PROJECTS

Free Kid's craft Ideas from

Paper Plate Polar Bear Craft

Supplies:

- 1/2 Sheet of Each White and Pink Construction Paper.
- Black Construction Paper Scraps.
- Paper Plate.
- School Glue or a Glue Stick.
- Crayons.
- Scissors.

Begin by cutting out eyes from the black construction paper. You could pre-draw the eyes or free-hand cut them. Alternatively, you could cut out eye holes and turn this fun project into a mask!

Then, cut two ears from the white construction paper. Next, cut two pink construction paper semi-circles smaller than the ears to glue onto the white ears.

Now, cut a pink construction paper triangle nose.

Then, add glue to the backs of the eyes and nose and stick them onto the plate.

Use a crayon to draw the Polar Bear's mouth on the paper plate below the nose.

Now, use the glue stick to glue the pink semi-circles onto the white ears. And, apply a swipe of glue onto the right and left side of the top of the plate attach the white ears to the polar bear.
