

simple shape Princess

Princess made of simple shapes

Print this page with black ink only.

Cut out the shapes & color or use them as a pattern to draw the shapes on to colored construction paper to make her dress, tummy & arms. Use the page you printed this craft for the princess's head, long hair & crown. Glue the shapes together as shown – triangle skirt to square tummy to rectangle arms to the circle head attached to the crown. Color in hair for her forehead. Also, color the oval that you can glue to the back of her head to give her long hair. You can make up your own jewelry to decorate her or use sequins or glitter glue if available for the crown & dress. Give your beautiful princess a smile. If you have googly eyes & want to use them instead, just place over the printed eyes. You have connected shapes & made a beautiful princess too! Awesome!
