

# O is for Owl

Ask your parent to print out this sheet. Then color the triangle whatever color you like. Also, color the owl's legs & claws. Next, color the shape around the black part of the owl's eyes. When you have finished coloring, carefully cut out each shape, even the claws at the lines. When you cut the outside of the big letter O, ask Mom to help you with cutting out the center. Slightly cease the paper at the center marks & cut out the center of the letter O. When all the shapes are cut out, place them where they should go before you glue each piece in place.

Trace your child's hands or fold the paper in half & trace once. Cut out their handprints. Cut out 2 small ovals for feet in different color paper & use that same color for the triangle for the beak. Use the template below for the body using the same color paper for the handprints. Add 2 googly eyes or use the 'Build an owl' template and use your child's handprint in place of the smaller wings.
